

HURRICANE

A NEW MILLENNIUM OF **BOAT LIFTS**

YOU'VE MADE THE INVESTMENT, NOW

ENJOY THE WATER

Hurricane Boat Lifts was founded by Tracy Radcliff in 1998 with the mission to "design and build the highest quality, most attractive lifts at affordable prices." Today we are proud to continue that mission and honor our founder's vision by keeping our lifts current to handle today's boats which are larger, faster and more complex with multi-step hulls, stabilizing gyros, enhanced electronics, etc. Our customers are constantly telling us that our lifts are not just reliable, sturdy and long lasting, but they also "just look better" than other boat lifts.

Over 50 years of engineering & manufacturing experience have been applied into the design of Hurricane Boat Lifts' products. The resulting designs incorporate the highest-grade aluminum for marine applications, Stainless Steel Cables, Stainless Steel fasteners, Stainless Steel motors and marine tested gear boxes. Not only do we have top of the line designs...we also have a top of the line manufacturing facility. We operate our own CNC machine shop, industrial saws, welding shop and finished lift assembly. By controlling the finished product design & manufactured quality we are able to offer warranties unequalled in the boat lift industry.

Through design & quality we offer a customer experience that is noted for ease of installation and simplicity of operation. When combining with a focus on Customer Service the result is Customer Satisfaction second to none.

Hurricane Boat Lifts is represented by a highly capable international network of marine dealers ready to serve your needs, but if you happen to find yourself in the Stuart, Florida area, please stop by our showroom, look at our models, and ask for me personally. I am never too busy to talk to boat owners about their needs and to help customers choose the lift for their location. I can also refer you to the many satisfied customers who will attest that Hurricane Boat Lifts offer the ideal combination of strength and beauty in the market.

WHICH LIFT IS FOR YOU?

We manufacture a wide variety of lifts. Whether you are on a lake, canal, intracoastal, shallow

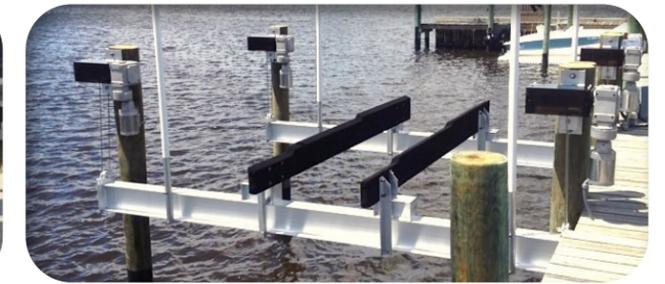

or deep water, we have a lift that will suit your needs. At Hurricane Boat Lifts we create a

boating experience that is easy and hassle-free. Choose from 8 different categories of lifts.

If you are in need of a custom lift, feel free to contact us and we will design a lift just for you.

EVERYTHING YOU NEED TO KNOW ABOUT
CHOOSING YOUR GEAR

We have the gear drive for you: from industry standard compact gear drive to the unsurpassed speed of the Hurricane "UHS" Ultra High Speed Gear. With all our available options, why look anywhere else?

**Standard-Duty
Compact Gear**

This is one of our most popular gears with safe, quiet operation. The Standard-Duty Compact Gear has a 370:1 ratio and is used in most lifts up to 16K lbs.

**Heavy-Duty
Gear**

This Heavy-Duty Gear is used in our CAT5-40K to 60K lifts and our CAT3-27K lifts. It has a gear ratio of 450:1.

**Extra Heavy-Duty
Gear**

Our Extra Heavy-Duty Gear is used in our largest CAT3 & CAT5 Lifts up to 100,000 lbs. This gear is a "beast" with a 500:1 gear ratio.

**HD High Speed
Gear**

This HD High Speed gear boasts a 198:1 gear ratio. This is a high speed option on lifts up to 40K lbs.

**Ultra High Speed
Gear**

Our Ultra High Speed (UHS) gear is sleek, maintenance free and quiet. With a 165:1 gear ratio it is also Fast. It is standard with our *Signature* lifts up to 40K lbs.

All Hurricane Series gears come with a 5 year warranty
